Hoggard-Eure Associates Firm Overview

Since 1984 Hoggard-Eure Associates is a long standing, knowledgeable, and well respected Engineering / Surveying / Planning firm in Southeastern Virginia that has been instrumental in the growth and development of the Hampton Roads area. We are located in Portsmouth, Virginia, in the heart of Hampton Roads' communities.

From a solid base in Civil Engineering, we have carefully augmented our staff to supply our clients with expertise in addition to related professional services, which include Surveying, and construction-related services.

Our long-term client base extends from the Mid-Atlantic region to International arenas. Our years of practical experience while working with governmental, public and private sector clients have enabled us to build a solid foundation of sound engineering, good economic principles, and teamwork.

As our world grows so does the concern for environmentally friendly design. Hoggard-Eure Associates is an ally of the green initiative and has proven low impact development and sustainable design know-how that has been recognized and merited with awards such as the LEED Gold® and LEED Platinum® level certification.

Hoggard-Eure Associates is more than capable of providing design and engineering services that comply with the latest regulatory standards. Staying a step ahead of the design curve is essential in order to provide our clients with well thought out design solutions in a timely and cost inhibitive manner.

Experience

Hoggard-Eure's experience includes many types of projects including:

- Apartments
- Bio-Remediation Facilities
- Design / Build
- Federal Government Projects
- Fire Fighting Training Facilities
- Municipal Facilities
- Mixed Use Development
- Museums
- Office Complexes
- Plant Nurseries
- Recreational Facilities
- Residential Development
- Restaurants
- Retail Facilities

Engineering

Hoggard-Eure's civil engineering capabilities encompass a full range of design services from schematic design to preparation of construction plans and specifications.

Civil Engineering services include:

- Construction Support / Contract Administration
- Environmental and Permitting
- Feasibility Studies
- Infrastructure Improvements
- Landscape Architecture / Planting Plans
- Stormwater Management Plans and Permitting
- Site Planning and Design
- Utility Design and Permitting

Surveying

Hoggard-Eure's surveyors are fully equipped with state-of-the-art survey equipment and software, providing our clients with fully automated services from the initial contact to the final plat. In addition, the location of horizontal and vertical control points can be accurately established by the use of Global Positioning System equipment.

Surveying services include:

- Acquisition and Right of Way Plans
- ALTA/ACSM Land Title
- As-Built Plans
- Boundary Surveys
- Construction Layout
- Location Surveys
- Geodetic Control
- Property Subdivision
- Topographic Surveys

Planning

The key to land planning is to obtain "the best use" of property. Our services in land planning include Concept Plans, Conditional Use Permits, Feasibility Studies, Land Use Permits, Pedestrian and Vehicular Traffic circulation systems, Zoning and Re-zoning.
